

Corporate Profile

REVOLUTIONIZING BUSINESS MANAGEMENT WITH AI & AUTOMATION

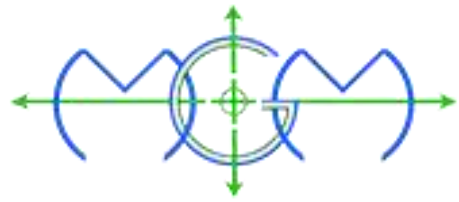

OUR COMPANY

Initially, in 2022, our LLP company set itself the limited target of building a platform exclusively to automate and digitise the movement of school buses & personnel entry and exits at the campus gates of schools. Our solution was quickly adopted by eminent establishments such as the Pathways and Banyan Tree School Groups and the Prometheus school.

After a year of maturing this platform, the company decided to expand.

- In 2023, it was converted to Private Limited, and
- Took aboard its first non-promoter investment
- In 2024-25, a plethora of many more advanced solutions were built
- Introduced AI in some of these solutions
- Acquired new market segments, and
- Started engaging with clients abroad.

VISION AND MISSION

Vision

To be a Creator of Digital platforms focused on Management of Business

Mission

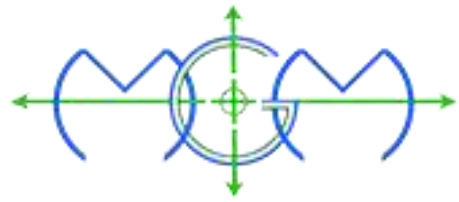

Aligning our products with AI to disruptive thrust areas

- Increase of People Centric Productivity
- Providing Actionable Analytics by Management
- Focussed Managed Services
